

EnterpriseCorp - IT Department FAQ

Confidential & Proprietary. For internal use by EnterpriseCorp employees only. This document supports our 20,000+ global employees across 8 countries, enabling our hybrid workforce to operate seamlessly.

1. Reset Password

EnterpriseCorp uses a Single Sign-On (SSO) environment. Your password grants access to the Employee Portal, Helpdesk, email, and internal tools.

Steps to Reset Your Password:

1. Go to the **SSO Login Page** at sso.enterprisecorp.com.
2. Click on the **"Forgot Password or Locked Account?"** link below the login form.
3. Enter your EnterpriseCorp Employee ID or primary email address.
4. Verify your identity using your pre-configured Multi-Factor Authentication (MFA) method (Okta Verify, SMS, or Authenticator App).
5. Enter and confirm your new password, ensuring it meets the 12-character complexity requirement.

Troubleshooting Questions:

Q: I lost my MFA device and cannot reset my password. What do I do?

A: You must contact the Internal IT Helpdesk via phone at +1-800-ENT-CORP. After verifying your identity with your manager, IT will issue a temporary bypass code valid for 15 minutes.

Q: My account keeps getting locked after I reset the password.

A: This usually happens if you have an older mobile device or an app still trying to authenticate with your old password. Update your password in your phone's email settings and clear your browser cache.

2. Raise Ticket

For hardware, software, or access requests, our Internal Helpdesk is available 24/7 across all 8 countries.

Steps to Raise an IT Ticket:

1. Navigate to the **Employee Portal** and click the **Internal Helpdesk** icon.
2. Select **Report an Issue** or **Request a Service**.
3. Choose the correct category (e.g., Hardware, Software, Access Management).
4. Fill out the mandatory fields: Summary, Detailed Description, and Urgency.
5. Attach any relevant screenshots or error logs.
6. Click **Submit** to generate a Ticket ID (e.g., INC-10293).

Troubleshooting Questions:

Q: What urgency level should I select?

A: Select 'High' only if a system outage is preventing an entire department or business unit from working. For individual laptop issues, select 'Medium'. General inquiries should be marked 'Low'.

Q: The Helpdesk portal is down, how do I raise a critical ticket?

A: In the event of a portal outage, you can email it-support@enterprisecorp.com which will auto-generate a ticket, or call the 24/7 Global IT Support hotline.

3. Check Ticket Status

Tracking the status of your reported issues ensures transparency and SLA adherence.

Steps to Check Ticket Status:

1. Open the **Internal Helpdesk** portal.
2. Click on **My Active Requests** in the navigation pane.
3. Find your Ticket ID in the list. The current state (New, In Progress, Pending User, Resolved) will be displayed.
4. Click on the ticket to read updates or add comments for the assigned technician.

Troubleshooting Questions:

Q: My ticket has been in "Pending User" status for days.

A: "Pending User" means the IT technician has asked for more information or authorization from you. Please open the ticket, read the latest comment, and reply. Tickets in this state for over 5 days are auto-closed.

Q: Can I escalate a ticket if it is taking too long?

A: Yes. If a ticket exceeds its SLA (48 hours for Medium priority), an "Escalate" button will appear next to the ticket in your portal. Clicking this alerts the regional IT Shift Lead.
